Greendet

ECOLOGICAL DETERGENTS

PRESENTATION

Greendet emerged in 2009 recognising the emerging need for ecological, efficient and competitive cleaning products.

With our production unit in Coimbra, Portugal, Greendet exists with the purpose of creating differentiated ideas and products, resulting from the association with the research and development group of the Department of Chemistry of the Faculty of Coimbra of Sciences and Technology.

Greendet aims to produce cleaning products that represent an economic alternative of the highest quality, as well as to develop cleaning products that are better from an environmental point of view, more biodegradable and more effective in lower concentrations.

Maximum efficiency with the lowest environmental impact, this is the force that moves us.

Greendet

ECOLOGICAL DETERGENTS

Greendet's cleaning products for domestic use take up as little space as possible, ensuring maximum efficiency in cleaning and disinfecting your home.

The domestic line has containers of 2 liters, 1 liter and 0.5 liters for a manual dosing.

Greendet offers a wide range of professional products which meet the most demanding and strict cleaning and disinfection needs.

This line has 5 liter containers, ideal for cleaning larger surfaces.

KITCHEN

In the kitchen, hygiene and cleanliness always come first. Greendet's range of products offers a variety of cleaning products aimed at keeping the kitchen clean and disinfected, guaranteeing optimal results against germs and bacteria, in an easy and efficient way.

5 L

Cod. 101

pH = 7

1 L

Cod. 301

D-MANUAL

BACTERICIDE MANUAL DISHWASHER

Product with high concentration of cleaning agents and capable of removing even the toughest grease. It is a suitable product for the washing of all type of crockery, glassware and cutlery. Thanks to its neutral pH it is not aggressive to the hands nor the skin. Its components are readily biodegradable.

Cod. 102

D-WASH

DISHWASHER DETERGENT

5 L

pH = 13,4

Very alkaline product, with high concentration of sequestrants, which allow optimum cleaning results even in hard water. It has a high capacity of elimination of grease, even the dry and incrustated one. It does not produce foam guaranteeing exceptional results in your dishwashing activity. Its components are readily biodegradable.

D-RINSE RINSE AID

Product with high drying power. Added to the dishwashing cycle, will leave your crockery, glassware and cutlery shiny and without any water stain. It eliminates the limestone from the water avoiding it being deposited in the dishes, glassware and the dishwasher thus protecting all the vital parts of the equipment. Its components are readily biodegradable.

S-INOX STAINLESS STEEL CLEANER

Acidic product, which effectively removes even the most difficult dirt (oxidation, grease, etc.) from all stainless steel parts, aluminum, steel, etc., leaving the surfaces shiny and looking new.

D-CALC DESCALER

5 L pH = 0,8

Product that removes residues and deposits of limestone, being suitable for periodic descaling and cleaning of your dishwasher as it cleans and protects the vital parts of the equipment. Its components are readily biodegradable.

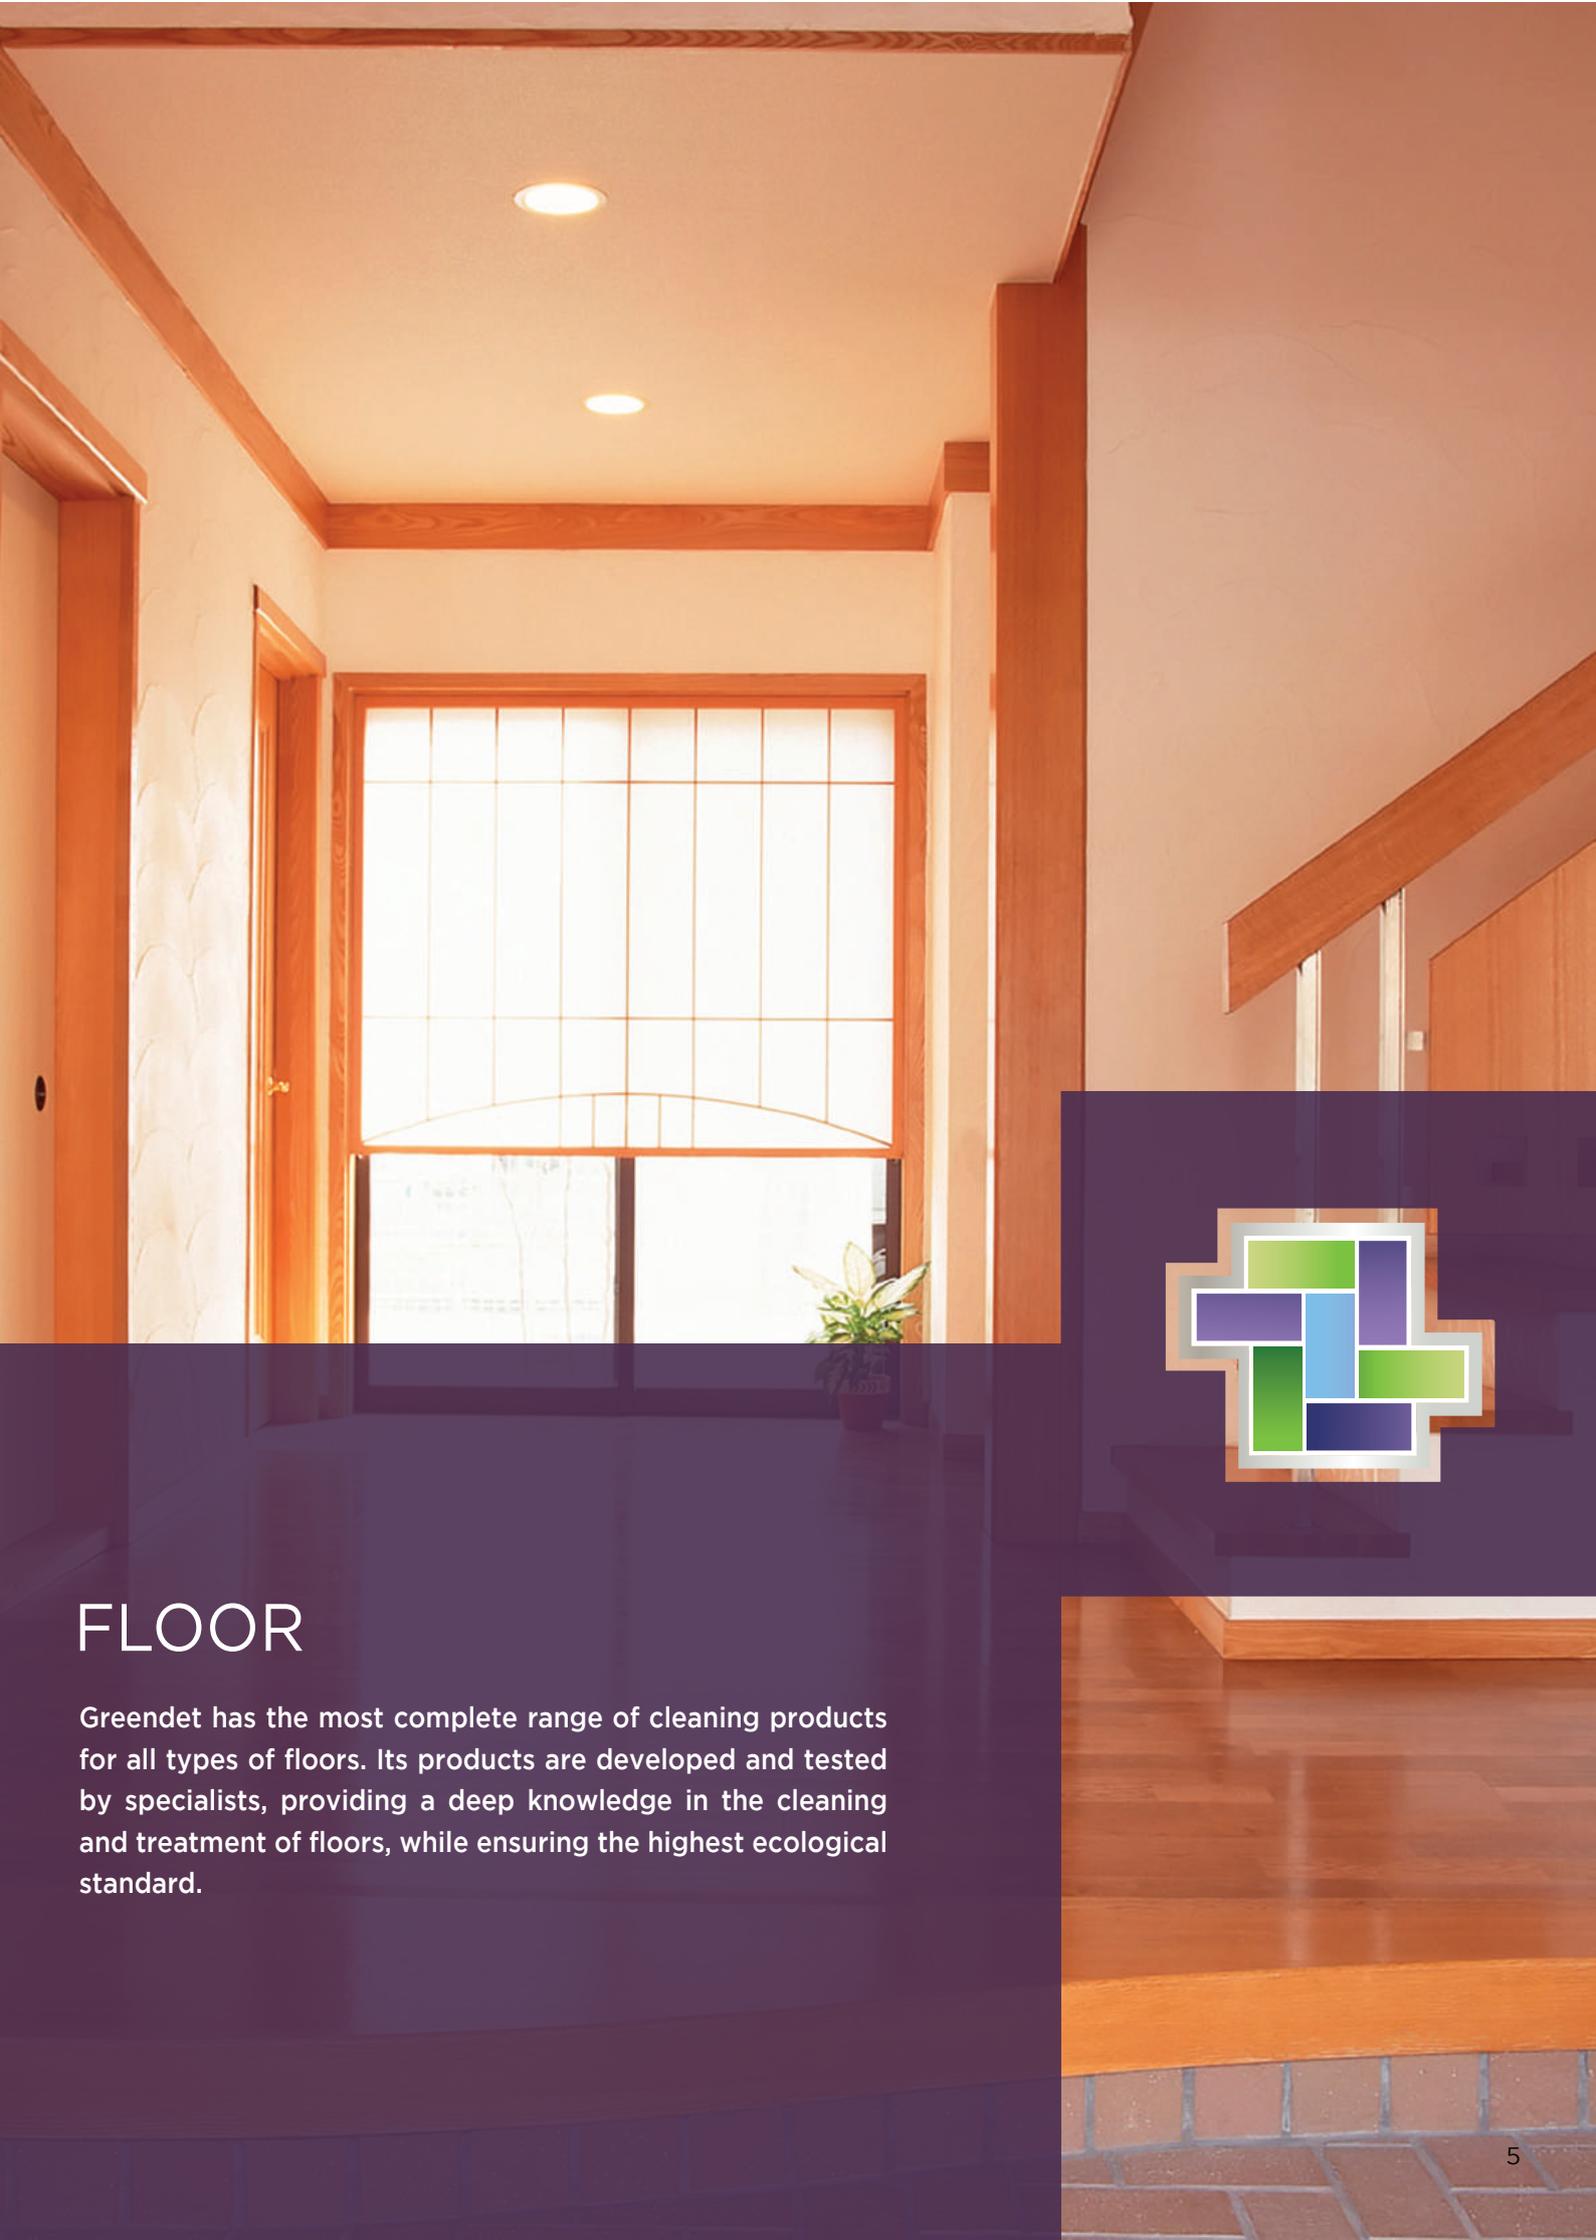

M-DISINFECT FOOD FOOD DISINFECTANT

5 L pH = 9,4

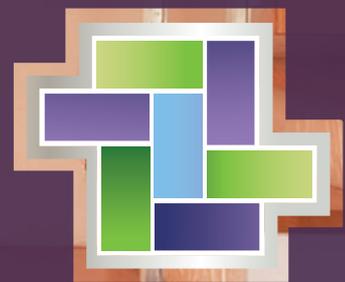

It is presented in a solution that besides being rich in chlorinated disinfectants, is free of toxic substances, allowing its use both in the food industry and its application in the disinfection of drinking water and for washing food.

Cod. 107

FLOOR

Greendet has the most complete range of cleaning products for all types of floors. Its products are developed and tested by specialists, providing a deep knowledge in the cleaning and treatment of floors, while ensuring the highest ecological standard.

M-WASH

BACTERICIDE UNIVERSAL CLEANER

[5 L]

Cleans and perfumes the entire surface. Its neutral pH does not damage the materials. Effectively removes all types of dirt, degreases and leaves a pleasantly scented environment for a long time. Indicated for cleaning floors and walls of all areas.

Cod. 121 LEMON

Cod. 122 TROPICAL

Cod. 125 WAX

[2 L]
Cod. 311 SPRING

S-WOOD WOOD CLEANER

Product designed for cleaning and caring of wood surfaces, leaving them impeccably clean and bright. Contains anti-static ingredients avoiding dust accumulation on surfaces. Its components are readily biodegradable.

W-WOOD NEUTRAL ACRYLIC WOOD WAX

Product designed for floors of wood, cork, vinyl, etc., providing glossy and non-slip finishes, with an excellent resistance to scratches and scuffs, without wiping. Its components are readily biodegradable.

W-HARD NEUTRAL ACRYLIC WAX FOR HARD SURFACES

Product indicated for tile, mosaic and stone, providing glossy and anti-slip finishes, with excellent resistance to scratches and frictions, without wiping. Its components are readily biodegradable.

WAX-OUT WAX STRIPPER

Aqueous stripper suitable for all types of wax, leaving the pavements ready to be waxed again. Its components are readily biodegradable.

OTHER SURFACES

This product line allows a deep and effective cleaning of the most diverse surfaces, such as glass, wood and stainless steel. Here we find from disinfectants multi-surfaces and waxes to paint strippers

MULTIDET DISINFECTION AND CLEANING

[1 L]

pH = 7,7

Product with neutral pH and high concentration of cleaning agents and disinfectants. It effectively removes all types of dirt and eliminates potentially dangerous microorganisms. Due to its composition and absence of perfume, it is indicated for use in HACCP systems, being indicated for cleaning floors and walls, equipment and worktops.

Cod. 100

M-DISINFECT SEPT

MULTI-SURFACE ANTISEPTIC DISINFECTANT

Product with high concentration of disinfectant agents capable of eliminating potentially dangerous microorganisms, such as bacteria and fungi. It is indicated for the cleaning of all type of surfaces like floors, counter-tops, tiles, plastics, metal, et cetera. Given the concentration of solvents, it easily eliminates all dirt leaving clean and luminous surfaces. Its components are readily biodegradable.

Cod. 137

WC-GEL

TOILET CLEANING GEL

Product with high cleaning power, capable of eliminating lime and potentially dangerous microorganisms, perfuming the area for a long time. Suitable product for cleaning toilets. Its components biodegrade rapidly.

5 L

S-GLASS

GLASS CLEANER

Product indicated for the cleaning of windows and surfaces with mirror effect. Thanks to the concentration of its solvents, it easily eliminates dirt, resulting in clear and shiny surfaces. Its components are readily biodegradable.

5 L

Cod. 138

COCO-VANILLA

Cod. 140

Cod. 340

NEUTRO

Cod. 141

WC-TOTAL

MULTI-PURPOSE BATHROOM CLEANER

Product with acid pH, high concentration of cleaning agents and powerful fat and lime removal capacity. Indicated for the cleaning of all surfaces of the bathroom. Its components are readily biodegradable.

5 L

M-PET PERFUMED CREOLIN

Biodegradable product with neutral pH, high concentration of disinfectant agents and low toxicity for humans and animals. It effectively removes all types of dirt and eliminates potentially dangerous microorganisms. Due to its composition and pleasant fragrance, it is indicated for the disinfection of all kinds of places where animals live such as stables, pens, dog houses, etc.

M-SOLVENT PAINT STRIPPER

Product with great stripping power able to remove different kinds of paints and inks. It is indicated for the removal of plastic inks, marker and acetates. It can be applied to different types of surfaces such as walls, countertops, windows, et cetera. Its components are readily biodegradable

P-SOLVE PIPE CLOG REMOVER

5 L **pH = 13,1**

Product with alkaline pH, formulated to easily and effectively eliminate pipe obstructions when mechanical methods do not work. Its components are readily biodegradable.

ODOUR-OUT ODOUR ELIMINATOR

Highly effective product in the elimination of bad odours (tobacco, garbage, footwear, pipes, etc.). It is a product that poses no risk to human health. Thanks to its composition deodorises and leaves a pleasant aroma on the treated surfaces. Its components are readily biodegradable.

PERSONAL HYGIENE

For taking extra care of your body, Greendet offers a line of pH neutral products, allowing frequent and correct washing and disinfection of your body, thus creating a barrier against germs and bacteria.

H-BODY NEUTRAL ANTIBACTERIAL SHOWER GEL

5 L

pH = 6,2

Antibacterial product with powerful concentration of cleaning agents, high hydration capacity of the skin and capable of eliminating potentially dangerous microorganisms. Thanks to its neutral pH and built-in moisturisers is a product suitable for frequent washing of the whole body. Its components are readily biodegradable.

5 L

Cod. 142

pH = 8,4

H-WASH ANTIBACTERIAL HAND SOAP

Disinfectant product with high concentration of cleaning agents indicated to eliminate the dirt and potentially dangerous microorganisms. Thanks to its neutral pH and the built-in moisturisers is a product suitable for frequent washing and disinfection of hands. Its components are readily biodegradable.

5 L

Cod. 145

NEUTRAL

5 L

Cod. 146

SILK

H-DISINFECT CARE ANTISEPTIC AND HYDRATING HAND GEL

5 L

pH = 6,7

Product with high concentration of disinfectant agents capable of eliminating potentially dangerous microorganisms, such as bacteria and fungi. It is not necessary to use water after its application, drying out quickly without leaving residue or irritating the hands thanks to its high hydration capacity. Its components biodegrade rapidly.

Cod. 147

DEGREASERS

The Greendet line of degreasers allows you to clean and degrease the most varied equipment and surfaces such as stoves, hoods, grills, tiles, countertops, among others, effectively eliminating all types of grease and carbon, even the most difficult ones.

pH =10,8

M-POWER MULTIPURPOSE DEGREASER

Slightly alkaline product, with a high concentration of cleaning agents and surfactants, which gives it a high fat removal capacity, even when dried and encrusted. Indicated for cleaning kitchens, extractors, fireplaces, grills, etc. effectively eliminating grease and carbon while perfuming the entire area. Its components biodegrade rapidly.

5 L

Cod. 154

0,5 L

Cod. 356

M-POWER MATIC CONTROLLED FOAM DEGREASER

5 L

pH =13,1

Degreasing detergent with high penetrating power and solvent agents for oil and proteinic dirt, ideal for all washable surfaces. The controlled foam formula makes it ideal for mechanical washing machines.

Cod. 155

pH =13,3

O-CLEAN CONCENTRATED DEGREASER

Alkaline product, with high concentration of cleaning agents and surfactants which gives it a high fat removal capacity, even dried and encrusted. Suitable for cleaning kitchens, extractors, grills, etc. effectively eliminating grease and carbon, even the most resistant. Can be applied on hot surfaces. Its components biodegrade rapidly.

5 L

Cod. 156

0,5 L

Cod. 355

O-CLEAN HI-TEMP VERY CONCENTRATED DEGREASER

5 L

pH =13,7

Strongly alkaline product, with high concentration of cleaning agents and surfactants which gives it a high fat removal capacity, even dried and encrusted. Suitable for cleaning kitchens, extractors, grills, etc. effectively eliminating grease and carbon, even the most resistant. Can be applied on hot surfaces. Its components biodegrade rapidly.

Cod. 157

O-FIREPLACE HEAT RECUPERATORS CLEANER

0,5 L

pH =13,6

Strongly alkaline product, with high concentration of cleaning agents. It is a product suitable for cleaning the windows of heat recuperators and other similar surfaces, effectively eliminating all the dirt, even the most difficult, and leaving the surfaces clean and shiny.

Cod. 357

LAUNDRY

Details that make the difference. Greendet laundry line provides extra ecological care to your fabrics, giving them a special softness. Thanks to its micro-capsulated perfume, it allows a long-lasting pleasant aroma.

L-WASH FABRIC DETERGENT

pH = 9,8

Product specially developed for washing clothes with difficult to remove stains, such as grease and other organic soils. It quickly penetrates the fibres, eliminating the most difficult stains. Its micro-capsulated perfume allows a longer duration and intensity of the scent, since the perfume is only released with the friction of movement. This is an eco-friendly product and quickly biodegradable.

L-SOFT FABRIC SOFTENER

pH = 4,1

Greendet has developed this softener to leave your clothes with a soft touch and with a fresh and pleasant fragrance. Its perfume in microcapsules, allows for a longer duration and intensity of the scent, since the perfume is only released with the friction of movement. It works on all temperatures, thus allowing cold water wash to save energy.

L-WHITE

OXYGEN-BASED BLEACHING DISINFECTANT

Specially developed for the washing of colour fabrics.

Washing additive, excellent source of active oxygen, a strong oxidant that confers a high power of protection of the colour and removal of the stain. This is an eco-friendly product and quickly biodegradable. It works at all temperatures, thus allowing cold water wash to save energy.

L-WHITE CL

CHLORINATED BLEACHING DISINFECTANT

Specially developed for the washing of linen and white fabric.

Washing additive, excellent source of chlorine, which confers a high whitening power to your white fabric.

CAR

To get your cleaning going, Greendet has created a line for cars, where you can find the most varied ecological products from brighteners and shampoos to rim cleaners, leaving your vehicle fresh and shinny, looking like new.

A-WASH CAR SHAMPOO

Product of high concentration of degreasing agents. It effectively removes all sorts of dirt even the toughest, leaving your vehicle looking clean and shiny.

A-GLASS CAR GLASS CLEANER

It is a product suitable for cleaning glass and all the mirrored surfaces of your car. Due to its high concentration of solvents, it can easily solubilise all soils, eliminating them with extreme ease and leaving the surfaces clear and shiny.

A-ANTIFREEZE CAR ANTIFREEZE

Product containing an ethylene glycol base (20%), together with corrosion inhibitors. It protects the entire internal cooling circuit of the motors, keeping it in a perfect state of cleanliness and operation, without attacking the different metallic or non-metallic components of the system itself. It is applied in different percentages depending on the different climatic needs.

A-DEGREASE CAR DEGREASER

[5 L] pH = 13,5

Product with high concentration of degreasing agents. It effectively removes all sorts of dirt even the toughest, leaving your vehicle looking clean and shiny.

Cod. 407

Cod. 408

A-GEL HEAVY-DUTY HAND WASHING GEL

5 L

pH = 8,5

Product suitable for hand washing in workshops or other areas where hands are in contact with oil, grease and other heavy-duty stains. Removes all dirt leaving your hands cared for and soft.

Cod. 397

A-RIM RIMS CLEANER

0,5 L

pH = 13,4

Product with high dirt removal capacity due to the high concentration of cleaning agents. Effectively removes all kind of grease and brake soot. Leaves the rims of your car looking shiny and new. Its components are readily biodegradable.

5 L

Cod. 411

pH = 6,8

0,5 L

Cod. 398

A-TABLIER

Designed to make it easy to remove dirt and dust from your car dashboard. It renews and protects surfaces, gives them luster and prevents the accumulation of dust, given its anti-static properties. User-friendly and easy on the environment, respects all surfaces in your dashboard. Its components are readily biodegradable.

5 L

Cod. 412

pH = 7,4

0,5 L

Cod. 399

A-WHEEL SHINE

Developed to brighten the rubber of your car tires. It gives the tires a fresh and shiny look. The product poses no risk to users. Its components are readily biodegradable.

AGRO-FOOD

This product line has been specially designed to improve food safety and productivity in this segment, ensuring the confidence of more and more consumers in an increasing number of markets.

Cod. 250

AGRO-DISINFECT CHLORINE ALKALINE FOAM

5 L

pH = 13,1

Cleaning and disinfection in a single stage of all types of protein, fat and blood soles designed for large surfaces in the food industry.

Cod. 251

AGRO-DISINFECT NON-FOAM CHLORINE ALKALINE NON-FOAM

5 L

pH = 13,1

Product especially recommended for cleaning and disinfecting processes in the brewing, dairy, beverage industry, among others (i.e. Circuits, filling lines, tanks, dispensers) as well as in livestock holdings for the cleaning and disinfection of tanks, circuits, milking equipment, and in general for energetic cleanings where a total absence of foam is required.

Cod. 252

AGRO-WASH

FOAMING ACID

5 L

pH = 0,5

Acid specially formulated to clean with foam all kinds of surfaces and containers of the food industry. Thus, this product allows for a prolonged contact time, eliminating limescale and protein deposits while preventing oxidation.

Cod. 253

AGRO-WASH NON-FOAM

NON-FOAMING ACID

5 L

pH = 0,5

Non-foaming detergent for daily use formulated for cleaning of milking machines, food processing equipment, milk coolers and all utensils and equipment where it is necessary to remove incrustations formed by milk minerals. Provides an anticorrosive effect for stainless steel and aluminum.

Cod. 254

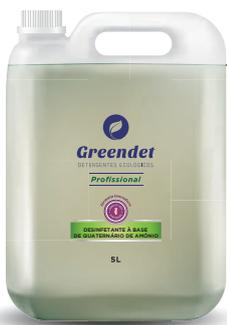

AGRO-PERACETIC

PERACETIC DISINFECTANT

5 L

pH = 2,2

This product is used for disinfection due to its sterilizing, fungicidal, viricidal, bactericidal and sporicidal properties.

Cod. 255

AGRO-DISINFECT SEPT

DISINFECTANT BASED ON
AMMONIUM QUATERNARY

5 L

pH = 8,5

Product designed for disinfection by spraying or immersion of equipment, food processing tables, valves, pipes, floors, walls and general facilities in the food industry.

SWIMMING POOLS

The cleanliness of your swimming pool is crucial for a fully enjoyable experience, guaranteeing your comfort in moments in which you look for total relaxation.

Cod. 450

POOL-CL10 10 EFFECTS CHLORINE

[| 5 Kg |](#)

Organic compound in slow dissolving tablets, stabilized, with a minimum active chlorine content of 86%, for disinfection and maintenance of pool water. Complete treatment of water: Disinfectant, algicide, bactericide, flocculant, rinse aid. Ensures continuous chlorination of the water, avoiding the loss of chlorine due to the sun and heat. It lacks the disadvantages of other types of chlorinated products, such as hypochlorites (liquid chlorine), which react with the salts of water causing precipitation of residues that block the holes, valves, etc.

Cod. 451

POOL-PH- PH MINUS

[| 5 Kg |](#)

This product is presented on a white granular crystal. It has a specific gravity of 2,103 and a melting point of 315 ° C. Sodium Bisulfate is used as a pH-modifying agent to replace the vitriol and is used as detergent for ceramic materials and marbles. It may also be used as a pretreatment agent for acidic washes and coatings.

Cod. 452

POOL-PH+ PH PLUS

[| 5 Kg |](#)

This product is presented on a crystalline white powder which is soluble in water and insoluble in alcohol. Sodium carbonate is used in the textile industry, in the manufacture of detergents, in the manufacture of glass, in the chemical industry, in metallurgical processes and in flammable gas treatments.

Cod. 453

POOL-FLOCCULANT FLOCCULANT

5 Kg

This product is a fine, white, granular solid. Aluminum sulphate is used in the treatment of water as a flocculant / coagulant. It is also used in the chemical industry, for the manufacture of fertilisers and additives for construction.

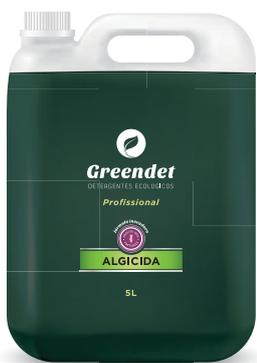

Cod. 454

POOL-SALT SALT IN PADS

5 Kg

This product is made of refined salt tablets and is completely soluble in water. It is obtained from high mechanical pressure without the use of anti-caking agents. The pads are made so as to obtain a high purity brine for regeneration of the ion exchange resins used in water descaling.

Cod. 455

POOL-ALGICIDE ALGICIDE

5 L

pH = 8,5

Chemical used to eliminate blue algae or green algae when they infest aquatic environments, causing undesirable effects, such as uncleanliness in swimming pools.
